

## **ATS Corporation Awarded Federal Election Commission Contract Valued up to \$1.2 Million**

MCLEAN, VA – October 23, 2007, ATS Corporation (“ATSC” or the “Company”) (OTCBB: ATCT.OB), today announced it has been awarded a \$1.2 million contract to support the Federal Election Commission’s (“FEC”) Legacy Conversion and Maintenance contract.

For the past few years, ATSC has been supporting the movement by the FEC to offload its current mainframe-based (1032 Legacy System) and transition the agency to a web-based platform. The 1032 Legacy System Offload project resulted in the successful migration of over a dozen major applications to a J2EE/Oracle environment.

Now under this new contract, ATSC will continue to develop the remainder of the 1032 system offload, perform day to day operations of the disclosure processes, and the maintenance of the disclosure system. This work will include the design and development of the remaining 1032 offload systems identified to be converted from the current legacy system to one of the identified newer technology systems.

As background on FEC, Congress created the FEC in 1975 to administer and enforce the Federal Election Campaign Act (“FECA”) - the statute that governs the financing of federal elections. The duties of the FEC, which is an independent regulatory agency, are to disclose campaign finance information, to enforce the provisions of the law such as the limits and prohibitions on contributions, and to oversee the public funding of Presidential elections.

### **About ATS Corporation**

ATS Corporation operates through its subsidiaries, ATS, Reliable Integration Services, Potomac Management Group (“PMG”), and Appix, Inc. (“Appix”).

ATS Corporation is a leading provider of systems integration and application development, IT infrastructure management and strategic consulting services to U.S. federal and state and local government agencies, financial institutions and government sponsored enterprises. Since its founding in 1978, ATS has been recognized for its custom software development and software integration capabilities and its deep domain expertise in federal government financial, human resource and data management systems. ATS has built and implemented over 100 mission-critical systems for clients.

Any statements in this press release about future expectations, plans, and prospects for ATSC, including statements about the estimated value of the contract and work to be performed, and other statements containing the words “estimates,” “believes,” “anticipates,” “plans,” “expects,” “will,” and similar expressions, constitute forward-looking statements within the meaning of The Private Securities Litigation Reform Act

of 1995. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: our dependence on our contracts with federal government agencies for the majority of our revenue, our dependence on our GSA schedule contracts and our position as a prime contractor on government-wide acquisition contracts to grow our business, and other factors discussed in our latest annual report on Form 10-K filed with the Securities and Exchange Commission on March 26, 2007. In addition, the forward-looking statements included in this press release represent our views as of October 23, 2007. We anticipate that subsequent events and developments will cause our views to change. However, while we may elect to update these forward-looking statements at some point in the future, we specifically disclaim any obligation to do so. These forward-looking statements should not be relied upon as representing our views as of any date subsequent to October 23, 2007.
